The Digital Decision

Forward Facing Threat Protection Through Advanced Technology

Security Solutions and Services Catalog

Pioneering and all-encompassing security solutions that combine advanced threat detection and situational awareness.

TECHNOLOGY & FEATURE SUMMARY:

Artificial Intelligence software for existing CCTV cameras enabling the leading intelligent AI solutions for video surveillance and real-time physical threat detection (AI & Computer Vision) to detect a wide variety of objects, actions, and behaviors to gain a new level of situational awareness.

- Brandished Weapons
- Behavior Anomaly (ex. Fight Detection)
- Vehicle LPR
- Perimeter Intrusion

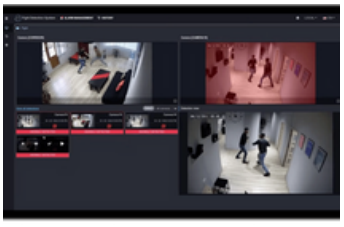
Signals/Device Detection allows administrators awareness to signal emitting devices within the environment, on or off production network whether connecting via Wi-Fi, Bluetooth, Cellular or other broad-spectrum IoT protocols.

Ultra Walkthroughs offers a versatile, cost-effective detection solution that allows organizations to implement screening wherever it's needed throughout the day, providing an adaptable and proactive layer of security. Whether conducting private, targeted individual screenings, or securing events, our portable system seamlessly integrates with your existing security measures without disrupting daily operations.

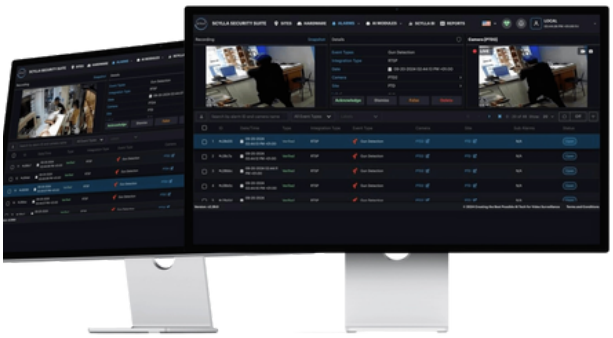
Program Management Services we offer PMP certified personnel to deliver products and services on time and in budget.

Integration we provide tailored application integration services to seamlessly connect your existing systems through our expert implementation support

AI-POWERED SECURITY CCTV CAMERA MODULES



- Real- Time behavior analysis through AI-driven action detection and classification
- Centralized system capable of managing multiple camera streams, integrates with existing CCTV
- Flexible deployment: choose on-site, cloud-hosted, or hybrid options
- Seamless integration with existing cameras and hardware; instant alerts to security (web / mobile)
- **Priced per module** (multiple modules may be layered per camera)

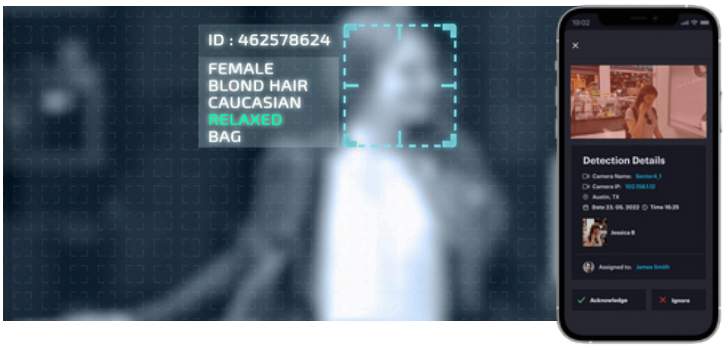


BRANDISHED WEAPONS $490 per module annually

100 PPM or 0 PPF allows AI to detect weapons from distances beyond human visibility. Rapid gun and weapon detection is crucial for reducing response times and effectively triaging threats in emergencies.

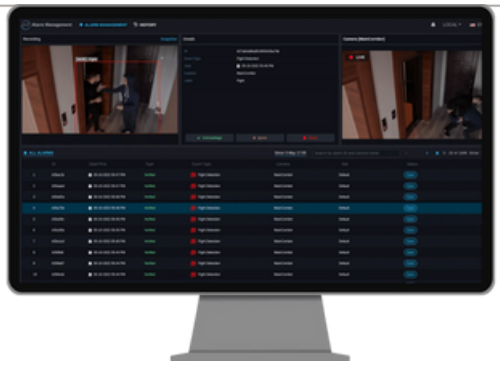
VEHICLE LPR $490 per module annually

License plates provide key evidence for secure facilities. Our technology matches faces to plates, alerts on prohibited persons, and tracks peak hours, unique and returning vehicles, total entries, and exits.



FACIAL RECOGNITION WATCHLIST $490 per module annually

Upgrade video surveillance with Face Recognition that harnesses the power of computer vision and artificial intelligence for the safety of your premises and people.



BEHAVIOR & ANOMALY $490 per module annually

Anomaly Detection and Behavior Recognition allows security professionals to detect and identify high-impact anomalous events as they occur in observing individuals in crowded environments.

PERIMETER INTRUSION $490 per module annually

Scylla high-precision AI surveillance technology can track individuals in the view of the camera, run real-time vehicles / people counting at your premises, and report cases of loitering and running in the areas of interest.

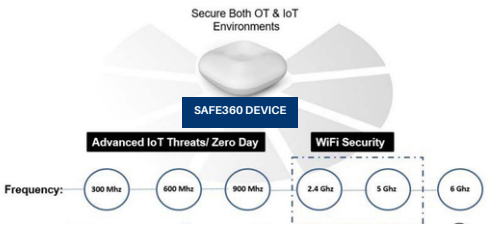
CONNECTED BUS $490 per module annually

Add technology to buses for situational awareness and weapons detection. In addition, integrating ALPR capabilities allows for the tracking of vehicles that violate stops.

- $490 Module Pricing assumes on-prem installation with a server.
- Cloud Module Pricing is $840 per module and does not require a physical server.
- Server costs depends on size of project but start at $5,880 for an Asteria M capable of handling up to 8 channels, other server options available
- Specs for customer provided servers provided upon request
- Monitoring Services 'Human in the Loop" are optional at $35 per camera per month
- Connected Bus referenced above assume buses already have cameras installed, if not, prices for cameras and other equipment required to support this feature start at $1,625.

DEVICE DETECTION - SAFE360 SOLUTION

SAFE360 offers non-intrusive real-time visibility, comprehensive monitoring, and protection for a wide range of wireless devices in IoT, Industrial Internet of Things (IIOT), Internet of Medical Things (IOMT), and OT environments. It works seamlessly regardless of the operating system, protocol, or connection type. **SAFE360 gives administrators the ability to see all devices that enter or exit their campus.**



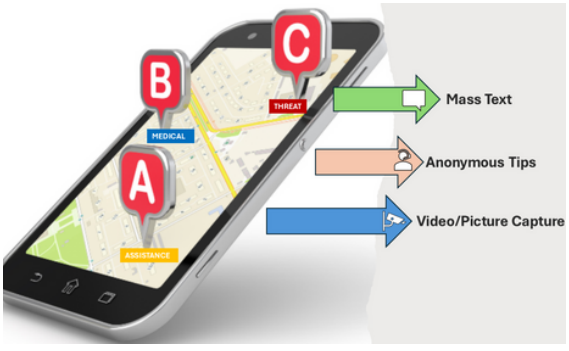
The Power of AI-Enabled Signal Intelligence
The increase in Wireless/RF devices has created a visibility challenge. The proliferation of wireless technology has introduced numerous new operating systems, protocols, and frequencies that are unknown and new to cyber security personnel, making it difficult to manage and protect this new attack surface.

With SAFE360, organizations can now proactively identify and categorize all emitting RF devices. This cutting edge technology gives enhanced situational device awareness within privacy compliance regulations.

SAFE360 $5,997 per unit plus install
SAFE360 Mini $1,595 per unit

ALERT-COM MOBILE APP

Alert-Com is a rapid notification and communication platform that allows users to instantly send alerts for emergencies such as active threats, medical situations, anonymous tips, and general assistance, severe weather updates—all from a mobile app. Available for Android and Apple



One-time Setup Fee
$685
Monthly Fee $417

The Digital Decision

WALK-THROUGH WEAPONS DETECTION - Your choice of two options

ULTRA WALK-THROUGH WEAPONS DETECTION

Uses sensor technology and AI and is designed to enhance security, create situational awareness by alerting on potential threats.

Technology you can count on. Efficient screening that doesn't hold up the line, but catches prohibited threat items. Ultra strikes the balance between accurate, precise screening that keeps prohibited items out and throughput that keeps people moving.

$21,995 per unit

$1,695 per unit (optional annual maintenance contract)

OPENGATE WALK-THROUGH WEAPONS DETECTION

A groundbreaking weapons detection system designed for faster screening of people with their backpacks, purses and bags, etc. for the detection of a large variety/number of Metal Threats, such as high caliber assault weapons.

Enhanced metal detectors provide fast and effective security and great visitor experience. The considerable task of planning a major security event requires the most reliable metal detectors for security checkpoint installations. Through its research and development there is continuous investment in the design of equipment that provides the best compliance with the security requirements in public events. The results are Metal Detectors that have extremely high immunity to outside interference and high discrimination of personal objects. This allows a higher flow rate and improved processing times.

$20,425 per unit

$1,260 per year (optional NET ID anywhere software)

$3,000 per site Service/Labor/Installation

BAG SCANNERS

Step into a new era of intelligent inspection with a bag scanner engineered for precision, reliability, and global readiness. Designed to meet the demands of high-security environments, this system blends advanced detection with seamless operation. Whether deployed in stadiums, airports, government buildings, or other high-security venues, this bag scanner delivers peace of mind through intelligent design and uncompromising safety.

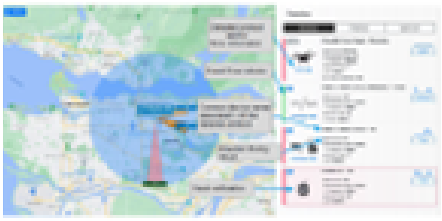
X-Ray Bag Scanner Options

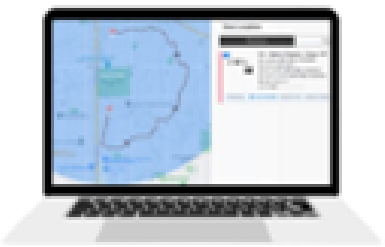
2MX-4233	2MX-5030	2MX-6040
$14,500	$15,625	$20,625

DRONE DETERRENCE SYSTEM

Secure your airspace, safeguard personnel and maintain operational integrity against the growing threat of drone misuse. Covers up to a 6-mile radius. Provides Drone detection and neutralization, drone disruption and device fingerprinting, digital forensics support, CCTV integration and support, Identifies Friend/Foe; ID Devices/Pilots.

DRONE DETECTION SYSTEM





SkyShield ™ $171,250
SkyShield ™ Mobile $69,998
OR
Drone-as-a-Service (DaaS)
$17,625 per month

Solutions offer 24/7 Drone Detection and Operational Support, Mission-Ready Security, Advanced Threat Intelligence

NFL Signals/Device and Drone Detection - **Case Study**

Services Pricing List

Installation Services	**$3,500 per day**
Training Services and Support	**$3,500 per day**
Integration Management	**$195/hour**
Program Management	**$175/hour**
Governance and Wrap-around Services	**$150/hour**
Human in the Loop Monitoring (Scylla modules)	**$35 per camera/month**
Professional Services**	**starting at $5,000 per instance**
Help Desk	**$1,500 per month**

**Professional Services cost depends on the size of the project. Our firm can provide a more detailed quote based on scope needed.
